The “Bound” Series by Robyn

- Although the objects are fairly simple on their own, in mass amounts they surround the individuals and create a sense of complexity and chaos.
- This makes an interesting contrast between the photos.
- In the photographs where the objects are neatly displayed and organized, they hold a innocent quality, but when they surround and almost consume the individuals they reveal a sense of superiority.
- Almost as though the people are consumed by their objects

Your Assignment

- Choose either the bound series, or the concept of revealing what is meant to be hidden and apply this to your life – or the life of an average teen
- What would you reveal?
- What would you be bound by?
- How would you stage/compose this shot?
